SECTION 1. For the purposes of this ordinance, the following definitions shall apply: a) "Delinquent amounts" shall refer to any delinquent real or personal property taxes, any delinquent sewer assessments or usage charges, or any delinquent water assessments or usage charges, and any interest, fees and charges thereon or related thereto. b) "Person" shall mean any individual, firm, company, partnership, association, society, corporation, group, or other entity.

(c) This section shall not be deemed to apply to those applications for permits which involve repair or construction work ordered by a public agency or for emergency work to be performed for public health and/or safety concerns, nor shall it apply to those applicants who are making improvements to their real property with loans or grants received under any State and/or Federal rehabilitation programs.

SECTION 3: No payment shall be made by the Finance Director of the Town of Middlebury or by any other Town official, department head, employee, board, commission or agency to any person who has sold goods or provided services to the Town or to any board, office, department, commission or agency thereof, if, at the time said payment is due, it is determined that said person owes delinquent amounts to the Town, provided that no such payment to be withheld shall exceed

This section shall not apply to the payment of wages to employees of the Town of Middlebury or any board, office, department, commission or agency thereof.

SECTION 4:

(a) Notwithstanding anything provided hereinbefore to the contrary, no certificate or permit under Section 2 hereof shall be withheld if the person owing said delinquent amounts has entered into a written agreement with the Town of Middlebury, by and through the Middlebury Tax Collector, which shall provide for an immediate payment to the Town of all outstanding interest, fees and charges included in said delinquent amounts and at least one half of the principal balance owed, and a payment plan requiring the installments over a period of no greater than twenty-four months from the date of said agreement. SCENIC ROAD ORDINANCE

PREAMBLE

The scenic and rural roads of the Town of Middlebury are an irreplaceable resource.

The scenic values of some rural roads in Middlebury have been reduced or are in danger of destruction because of past or potential alterations to their rights-of-way. Such alterations have had, and could continue to have, a significant adverse impact on the quality of the Town's environment in general, and, in particular, on aesthetic and historic values that are of great but immeasurable benefit to residents and visitors alike.

As explicitly expressed in Section 7-149a of the Connecticut General Statutes, the preservation of the scenic or historic values of rural roads is essential to the welfare of the people of Connecticut. It is the purpose of this Ordinance to balance that need in Middlebury with the traditional need to provide, in transportation matters, for common convenience and public safety.

Therefore be it ordained by the Town of Middlebury that, pursuant to the authority granted by Section 7-149a of the Connecticut General Statutes, the Town of Middlebury provide for the designation of Town roads ("highways") or portions thereof as Scenic Roads, and further in order to maintain the scenic nature of highways so designated, or portions thereof, the Town of Middlebury is authorized to regulate, in accordance with this Ordinance, the future alternation or improvement of roads so designated, including, but not limited to, widening of the right-of-way or of the traveled portion of the highway, paving, changes of grade, straightening, removal of stone walls and removal of mature trees.

Section I

Authority: The authority to designate a highway or any portion of any highway as a Scenic Road is hereby delegated to the Planning and Zoning Commission of the Town of Middlebury.

Section II

Designation Criteria:

- (a) No highway or portion of a highway shall be designated as a Scenic Road if the abutting property contains intensive commercial development or if the highway itself has intensive vehicular traffic. Prior to designating a highway or portion thereof as a Scenic Road, the Planning and Zoning Commission must first specifically find that at least one of the following criteria is met:
 - (1) the highway is unpaved;
 - (2) the highway is bordered by mature trees or stone walls;
 - (3) the traveled portion of the highway is no more than 20 feet in width;
 - (4) the highway offers scenic views;
 - (5) the highway blends naturally into the surrounding terrain; or

- (6) the highway parallels or crosses over brooks, streams, lakes, or ponds.
- (b) No highway or portion thereof may be designated as a Scenic Road by the Planning and Zoning Commission pursuant to this Ordinance unless the owners of the majority of the lot frontage abutting the highway or portion thereof agree to the designation of the highway as a Scenic Road by filing a written statement of approval with the Town Clerk of the Town of Middlebury.

Section III

Procedure for Designation

- (a) The Planning and Zoning Commission on its own initiative may consider a highway or portion thereof for Scenic Road designation. Property owners may petition the Planning and Zoning Commission for a designation of a highway or portion thereof as a Scenic Road. The petition shall state what road or portion of road is requested to be designated as a Scenic Road and describe those characteristics of the road which qualify it for Scenic Road status, as well as other characteristics which enhance the scenic character of the road. The petition shall be signed by the owners of a majority of lot frontage abutting the road or portion of road in question (such ownership shall be verified by the Town Assessor), stating that they approve of designating the road or portion of road a Scenic Road, and indicating, to the best of their knowledge, their lot frontage along the road or portion of the road in question. Each signer of the petition shall indicate his or her address. The petition circulator shall also include the names and addresses of the owners of lot frontage abutting the road or portion of road in question who did not sign the petition. The petition must contain the name, address and signature of the circulator of the petition, who must be a resident of Middlebury. Said petition shall also have a signed statement by the circulator that the circulator either knows each individual who signed the petition or that the signer satisfactorily identified himself or herself to the circulator.

The original petition shall be filed with the Town Clerk, who will make a copy to retain and forward the original to the Planning and Zoning Commission.

- (b) In order to designate a highway or portion thereof a Scenic Road, the Planning and Zoning Commission shall first hold a Public Hearing regarding the designation of such road as a Scenic Road. Notice of the public hearing shall be given by publication in a newspaper of general circulation in the Town of Middlebury at least twice in intervals of not less than two days, the first not more than 15 days, nor less than 10 days, and the last not less than two days prior to the date of such hearing and by sending a copy thereof by registered or certified mail to the owners of lots fronting the highway or portion of the highway proposed to be designated as a Scenic Road. The Planning and Zoning Commission shall act upon the designation within the period of time permitted under Section 8-26d of the Connecticut General Statutes, as amended. Notice of the decision of the Commission shall be published in a newspaper having a substantial circulation in the Town of Middlebury and addressed by certified mail to the owners of lots fronting on that highway or portion of highway thereof proposed to be designated as a Scenic Road, by its secretary or clerk, under his signature in any written, printed, typewritten or stamped

form, 15 days after such decision has been rendered. Such notice shall be a simple statement that the highway or a portion thereof was or was not designated as a Scenic Road by the Planning and Zoning Commission, together with the date of such action. The grounds for the designation or non-designation shall be stated in the records of the Commission and shall include in as much detail as possible the special features which make the highway so designated scenic, or the reasons for denying designation.

Section IV

RESCISSION AND APPEAL

- (a) The designation of a highway or a portion thereof as a Scenic Road may be rescinded by the Planning and Zoning Commission, using the above procedures.
- (b) Any person aggrieved by a decision of the Planning and Zoning Commission designating or refusing to designate a highway or portion of a highway as a Scenic Road, or rescinding, or refusing to rescind, a designation of a highway or portion of a highway as a Scenic Road, may appeal such decision in the manner and utilizing the same standards of review provided for appeals from the decisions of planning and zoning commissions under Section 8-8, as amended, of the Connecticut General Statutes.

Section V

APPLICATION FOR ALTERATIONS

- (a) **Preservation Objective.** Routine maintenance and the regulation of future alterations and improvements of designated highways shall be carried out so as to preserve the scenic characteristics of the highway which are indicated in the records of the Planning and Zoning Commission as the basis for the designation.
- (b) **Hearing and Decision Responsibility.** The alteration or improvement of a designated Scenic Road shall be determined by the Board of Selectmen. Any proposal for alteration or improvement, whether by public or private applicant, shall be submitted to the Planning and Zoning Commission, which shall hold a public hearing and submit findings of fact and a recommendation to the Board of Selectmen. The determination by the Board of Selectmen shall be based on the findings of fact of the Planning and Zoning Commission and shall give important weight to the Commission's recommendation, which may be modified or rejected only by a unanimous vote of the Board.
- (c) **Routine Road Maintenance.** Such maintenance within the right-of-way shall include removal of dead and seriously diseased or damaged trees and branches of trees; trimming of the tree branches that encroach on the traveled portion of the highway below the height needed to allow school buses and emergency vehicles to pass; trimming or removal of brush and removal of boulders or other obstacles that encroach on the traveled portion of the road; necessary trimming for utility lines; trimming of brush to enhance and protect scenic views, stone walls, mature trees and other characteristics of the Scenic Road set forth in the decision designating it a Scenic Road; correction of drainage problems; and graveling, retreatment and repair of existing roadway surfaces.

- (d) Natural Disasters. In the case of a natural disaster in which a road becomes impassable or unsafe for public travel, and access must be provided, emergency repairs may be made as needed.
- (e) Standards for Alteration. When contemplating alterations to a Scenic Road for common convenience and necessity, including, without limitation, safety reasons and Fire and Police consideration, the following procedures shall be followed by the Planning and Zoning Commission:
 - 1. Review of a suitable map, and where deemed necessary by the Planning and Zoning Commission, of a technical report documenting the cited hazard and offering alternative solutions.
 - 2. Holding a Public Hearing to allow full public participation.
 - 3. A decision making process that not only reviews the specific safety features, but also takes into account the overall impact of the possible change in a Scenic Road as well as the public response.
 - 4. The final decision shall reflect the least damage to the character of the Scenic Road. If stone walls or portions thereof must be removed, they shall be rebuilt along the untraveled portion of the Scenic Road.
 - 5. If alterations to a Scenic Road are required, then they shall be planned with due regard to the following parameters:
 - a. Speed Limits. Scenic values are correlated with lower speeds. The lower speed shall be posted and suitably enforced.
 - b. Curves. Scenic values are correlated with the existence of curves, which allow a constant unfolding of new and changing views. Curves shall not be eliminated until they are found to be a definite hazard within the concept of the specific road.
 - c. Grades. Hills and valleys are correlated with scenic values. They shall not be destroyed by cuts and fills unless absolutely essential for road safety.
 - d. Widths. A narrow road is correlated with high scenic beauty. Designated highways should not be widened unless the amount of traffic, as determined by a factual study, demands it. For some rural roads, the amount of traffic that can be handled can be greatly increased by wide bypasses and turnouts, constructed at intervals where they do least damage to scenic and other values.
 - e. Side Slopes. Existing steepness of side slope is preferable to reduction of gradient by extensive removal of soil and rock. This is especially true where the slope is fully stabilized and where it is rich with existing ground cover, shrubs and trees.
 - f. Vistas. Vistas of distant landscapes shall be preserved by suitable Vegetation Management techniques.
 - g. Utility Lines. Wherever possible, utility lines should be put underground. Where they are overhead the utility corporations should cooperate by implementing suitable vegetation management techniques, which preserve the wild flowers and the shrubs.
 - h. Vegetation. Vegetation on the side of the road shall be managed in such a

way as to preserve wild flowers, shrubs or ornamental wildlife values, and trees. Overarching isolated trees, and the canopy of a closed forest, can have extremely high scenic value.

- i. Billboards, sand, gravel and salt piles, refuse disposal, and other unsightly structures or situations shall be forbidden. Where possible, scenic and preservation easements should be acquired from adjacent owners to insure the continuance of natural relief, desirable features, and scenic and historic values in the Public Interest.

Any action under Section V, subparagraphs A, B, C and D, shall be taken in a manner which will avoid or reduce adverse effects on the characteristics of the designated highway specified in the decision designating it a Scenic Road. Any reconstruction of a designated highway shall be done in similar manner with a view to restoring the road to the extent possible to its scenic character at the time of designation.

- (f) Paving Criteria. Paving of the unpaved traveled portion of a Scenic Road shall be permitted only if the owners of a majority of lot frontage along the unpaved portion of the road indicate their approval of the paving by signing a written statement agreeing to the paving and filing it with the Town Clerk.
- (g) Rights of Landowners. Nothing in this Ordinance shall be deemed to prohibit a person owning or occupying land abutting the highway or portion thereof designated as a Scenic Road by the Planning and Zoning Commission from (1) maintaining and repairing the land which abuts the road so designated if the maintenance occurs on land not with the right-of-way, paved or unpaved, of the Scenic Road; or (2) having access to his property by driveway or subdivision road by encroachment within the rights-of-ways, provided that such encroachment is constructed so as to safeguard the highway's scenic features as recorded by the Planning and Zoning Commission.

Nothing herein shall prohibit a landowner from permanently removing a portion of a stone wall in order to construct or improve a driveway or, in the case of a subdivision, to connect a subdivision road with a designated Scenic Road.

Section VI

ENFORCEMENT

The Ordinance shall be enforced by the Planning and Zoning Commission, acting through its designated enforcement official(s).

Violation of this Ordinance shall be subject to a fine not exceeding \$100.00 per day for each day the violation continues, and such other legal remedies as may be available to the Commission.

Section VII

SEVERABILITY

If any portion of this Ordinance is determined by a court of competent jurisdiction to be invalid or unenforceable in any respect, and such determination has not been reversed or overruled, that portion shall be deemed severed from this Ordinance, and the remainder of this Ordinance shall be treated as if it had been enacted separately without the inclusion of the portion determined to be invalid or unenforceable.

No person shall discharge or cause to be discharged into the municipal storm drain system or watercourses any materials, including but not limited to pollutants or waters containing any pollutants that cause or contribute to a violation of applicable water quality standards, other than stormwater.

The commencement, conduct or continuance of any illegal discharge to the storm drain system is prohibited except as described as follows:

- (1) The following discharges are exempt from discharge prohibitions established by this ordinance providing they contain no pollutants: water line flushing, landscape irrigation or lawn watering, diverted stream flows, rising ground water, ground water infiltration to storm drains, uncontaminated pumped ground water, foundation or footing drains (not including active groundwater dewatering systems), crawl space pumps, air conditioning condensation, springs, natural riparian habitat or wetland flows, fire fighting activities, and any other water source not containing Pollutants.

SECTION 8. SUSPENSION OF MS4 ACCESS.

Suspension due to Illicit Discharges in Emergency Situations

The Board of Selectman of the Town of Middlebury may, without prior notice, suspend MS4 discharge access to a person when such suspension is necessary to stop an actual or threatened discharge which presents or may present imminent and substantial danger to the environment, or to the health or welfare of persons, or to the MS4 or Waters of the United States. If the violator fails to comply with a suspension order issued in an emergency, the authorized enforcement agency may take such steps as deemed necessary to prevent or minimize damage to the MS4 or Waters of the United States, or to minimize danger to persons.

Suspension due to the Detection of Illicit Discharge

Any person discharging to the MS4 in violation of this ordinance may have their MS4 access terminated if such termination would abate or reduce an illicit discharge. The authorized enforcement agency will notify a violator of the proposed termination of its MS4 access. The violator may petition the authorized enforcement agency for a reconsideration and hearing.

A person commits an offense if the person reinstates MS4 access to premises terminated pursuant to this Section, without the prior approval of the authorized enforcement agency.

SECTION 9. INDUSTRIAL, COMMERCIAL OR CONSTRUCTION ACTIVITY DISCHARGES.

Any person subject to an industrial, commercial or construction activity NPDES stormwater discharge permit shall comply with all provisions of such permit. Proof of compliance with said permit may be required in a form acceptable to the Board of Selectman of the Town of Middlebury prior to the allowing of discharges to the MS4.

SECTION 10. MONITORING OF DISCHARGES

1. Applicability.

This section applies to all facilities that have stormwater discharges associated with industrial, commercial or construction activity.

2. Access to Facilities.

- (1) The Board of Selectman of the Town of Middlebury shall be permitted to enter and inspect facilities subject to regulation under this ordinance as often as may be necessary to determine compliance with this ordinance. If a discharger has security measures in force that require proper identification and clearance before entry into its premises, the discharger shall make the necessary arrangements to allow access to representatives of the authorized enforcement agency.
- (2) Facility operators shall allow the Board of Selectman of the Town of Middlebury ready access to all parts of the premises for the purposes of inspection, sampling, examination and copying of records that must be kept under the conditions of an NPDES permit to discharge stormwater, and the performance of any additional duties as defined by state and federal law.
- (3) The Board of Selectman of the Town of Middlebury shall have the right to set up on any permitted facility such devices as are necessary in the opinion of the authorized enforcement agency to conduct monitoring and/or sampling of the facility's stormwater discharge.
- (4) The Board of Selectman of the Town of Middlebury has the right to require the discharger to install monitoring equipment as necessary. The facility's sampling and monitoring equipment shall be maintained at all times in a safe and proper operating condition by the discharger at its

own expense. All devices used to measure stormwater flow and quality shall be calibrated to ensure their accuracy.

- (5) Any temporary or permanent obstruction to safe and easy access to the facility to be inspected and/or sampled shall be promptly removed by the operator at the written or oral request of the Board of Selectman of the Town of Middlebury and shall not be replaced. The costs of clearing such access shall be borne by the operator.
- (6) Unreasonable delays in allowing the Board of Selectman of the Town of Middlebury access to a permitted facility is a violation of a stormwater discharge permit and of this ordinance. A person who is the operator of a facility with a NPDES permit to discharge stormwater associated with industrial, commercial or construction activity commits an offense if the person denies the authorized enforcement agency reasonable access to the permitted facility for the purpose of conducting any activity authorized or required by this ordinance.
- (7) If the Board of Selectman of the Town of Middlebury has been refused access to any part of the premises from which stormwater is discharged, and he/she is able to demonstrate probable cause to believe that there may be a violation of this ordinance, or that there is a need to inspect and/or sample as part of a routine inspection and sampling program designed to verify compliance with this ordinance or any order issued hereunder, or to protect the overall public health, safety, and welfare of the community, then the authorized enforcement agency may seek issuance of a search warrant from any court of competent jurisdiction.

SECTION 11. REQUIREMENT TO PREVENT, CONTROL, AND REDUCE STORMWATER POLLUTANTS BY THE USE OF BEST MANAGEMENT PRACTICES.

The Board of Selectman of the Town of Middlebury will adopt requirements identifying Best Management Practices for any activity, operation, or facility that may cause or contribute to pollution or contamination of stormwater, the storm drain system, or waters of the state. The owner or operator of a commercial or industrial establishment shall provide, at their own expense, reasonable protection from accidental discharge of prohibited materials or other wastes into the municipal storm drain system or watercourses through the use of these structural and non-structural BMPs. Further, any person responsible for a property or premise, which is, or may be, the source of an illicit discharge, may be required to implement, at said person's expense, additional structural and non-structural BMPs to prevent the further discharge of pollutants to the municipal separate storm sewer system. Compliance with all terms and conditions of a valid NPDES permit authorizing the discharge of stormwater associated with industrial or commercial activity, to the extent practicable, shall be deemed compliance with the provisions of this section. These BMPs shall be part of a stormwater pollution prevention plan (SWPPP) or stormwater management plan (SMP) as necessary for compliance with requirements of the NPDES permit.

SECTION 12. WATERCOURSE PROTECTION.

Every person owning property through which a watercourse passes, or such person's lessee, shall keep and maintain that part of the watercourse within the property free of trash, debris, excessive vegetation, and other obstacles that would pollute, contaminate, or significantly retard the flow of water through the watercourse. In addition, the owner or lessee shall maintain existing privately owned structures within or adjacent to a watercourse, so that such structures will not become a hazard to the use, function, or physical integrity of the watercourse.

SECTION 13. NOTIFICATION OF SPILLS.

Notwithstanding other requirements of law, as soon as any person responsible for a facility or operation, or responsible for emergency response for a facility or operation has information of any known or suspected release of materials which are resulting or may result in illegal discharges or pollutants discharging into stormwater, the storm drain system, or water of the state said person shall take all necessary steps to ensure the discovery, containment, and cleanup of such release. In the event of such a release of hazardous materials said person shall immediately notify emergency response agencies of the occurrence via emergency dispatch services. In the event of a release of non-hazardous materials, said person shall notify the authorized enforcement agency in person or by phone or facsimile no later than the next business day. Notifications in person or by phone shall be confirmed by written notice addressed and mailed to the Board of Selectman of the Town of Middlebury within three business days of the phone notice. If the discharge of prohibited materials emanates from a commercial or industrial establishment, the owner or operator of such establishment shall also retain an on-site written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three years.

SECTION 14. ENFORCEMENT.

1. Notice of Violation.

Whenever the Board of Selectman of the Town of Middlebury finds that a person has violated a prohibition or failed to meet a requirement of this Ordinance, the authorized enforcement agency may order compliance by written notice of violation to the responsible person. Such notice may require without limitation:

- (a) The performance of monitoring, analyses, and reporting;

It shall be unlawful for any person, owner, agent or person in possession of any premises to refuse to allow the government agency or designated contractor to enter upon the premises for the purposes set forth above.

SECTION 17. COST OF ABATEMENT OF THE VIOLATION.

Within 30 days after abatement of the violation, the owner of the property will be notified of the cost of abatement, including administrative costs. The property owner may file a written protest objecting to the amount of the assessment within 15 days. If the amount due is not paid within a timely manner as determined by the decision of the municipal authority or by the expiration of the time in which to file an appeal, the charges shall become a special assessment against the property and shall constitute a lien on the property for the amount of the assessment.

Guidelines:

The following guidelines shall be implemented when any Street opening permit, lateral trench or utility service cut is approved within a Town of Middlebury right-of-way.

Road/Trench Repairs in Town Roads:

It is the intent of the Town that the existing Town roads shall be restored equal to or better than that in which they were prior to construction.

Paving requirements for road/trench repairs shall be as follows:

1. For roads that have been resurfaced within the last five (5) years, milling and paving of the entire roadway from curb to curb shall be required.

2. For roads that have been resurfaced more than five (5) years ago but ten (10) or less years ago or if any damage or pavement disturbance occurs to more than 1/3 of the road surface including the required pavement cutbacks, milling and paving of the entire roadway will be required. The pavement surrounding and including the excavation shall be milled to a depth of two (2) inches from edge of pavement to edge of pavement. When determining the starting and ending points for the milling, consideration will be given to existing pavement joints and intersection streets. The milled edges shall be vertically faced and not tapered. The entire milled area including the edges shall be swept clean and tack coated. Pavement for overlays shall be Class 2.
3. For roads that have been resurfaced more than ten (10) years ago or if there is any damage or pavement disturbance that occurs to more than 1/3 of the road surface including the required pavement cutbacks, milling and paving of 1/2 the roadway (the impacted lane) shall be required.
4. For roads that had been resurfaced more than ten (10) years ago and if the Contractor's work is completed without pavement disturbance or any damage to the remaining road surface (including, but not limited to track marks) and if the Contractor's work impacts less than 1/3 of the road surface width including the required pavement cutbacks, the Board of Selectmen may allow the Contractor to provide a Permanent Pavement Trench Repair instead of milling and paving.
5. Infrared technology may be required for Permanent Pavement Trench Repairs.
6. If any pavement markings are affected by the Contractor's work, they shall be replaced in-kind by a pre-approved pavement marking company at the expense of the Contractor.

Standard Road/Trench Repair Requirements

Pipe Line Projects:

Non-emergency pipe line projects will not be approved or allowed to continue construction during the winter months when asphalt plants are closed.

Payment in lieu of Final Pavement:

The Town of Middlebury may accept payment in lieu of final paving for large pipeline projects. The amount shall be agreed upon by the Town of Middlebury and the Contractor or Utility. The funds collected shall be put aside and used to repave the same road in the future. The Contractor shall provide an acceptable pavement base and trench pavement as approved by the Town of Middlebury. This does not in any way release the Contractor from their responsibility to maintain the trench pavement for a minimum period of 3 years following their final inspection.

Backfill:

The excavation shall be filled with suitable material and compacted in lifts not to exceed Twelve (12) inches, a minimum of 95% compaction must be achieved for each lift. Twenty four (24) inch lifts may be approved provided it is compacted by means of a hoe-pack to achieve a 95% modified proctor density. Each layer shall be carefully and thoroughly tamped with approved tools in such a manner as to prevent settlement after the backfill has been completed and to achieve a 95% modified proctor density. Emergency winter

work will require that all backfill be processed aggregate. If physical evidence suggests to the inspector that compaction of the backfilled trench is not suitable, compaction tests will be required to verify that proper compaction was achieved. The independent materials testing contractor will be selected by the Town and all costs for compaction tests will be borne by the Contractor. The Town may require an inspector to be on-site for larger projects. The additional cost of an inspector for larger jobs shall be borne by the Contractor. If settlement occurs, the Public Works Director may require test pits to determine the character of the backfill and process materials and order appropriate repairs to be made.

Saw Cutting:

The utility and/or contractor will be required to saw cut the pavement edges in a neat straight line to a depth necessary to remove the pavement to the sub base. Cut backs of 2 feet minimum around the entire excavation are required.

Temporary Trench Repair:

All excavations occurring during the construction season shall be plated or temporarily paved with hot mix asphalt (HMA) at the end of each day, unless pre-approved by the Town. Emphasis must be placed on the backfilling and compaction of the trench to avoid any future settlement. Temporary repairs shall include processed gravel to a depth as required to obtain 10 inches following permanent repair (also read Permanent Pavement Trench Repair). After compaction of process gravel, the excavated area shall be paved with 2.5 inches (after compacted) of bituminous concrete Class 1. Cold patch (if approved) shall be Class 5A, and shall only be allowed for emergency work during the asphalt plant winter shutdown when hot material is not available. Road plates are not allowed from November 15 to April 1. All compaction and paving shall be completed in accordance with the most recent edition of the State of Connecticut Department of Transportation, Standard Specifications for Roads, Bridges and Incidental Construction, Form 816.

Permanent Pavement Trench Repair:

Following a settlement period minimally of 6 to 10 weeks, the final trench repair shall be completed. This process will include the removal of temporary pavement, the compaction of the base material and the placement of five (5) inches of bituminous concrete in two lifts (2.5 inches Class 1 and 2.5 inches of Class 2). Original pavement edges shall be saw cut to two neat, straight lines to a depth necessary to remove all pavement, cut backs of 2 feet minimum around the entire excavation is required. Full depth replacement is required for pavement removed during the excavation that exceeds 5". If the surrounding pavement exceeds 5" in depth the Contractor shall be required to make up the additional depth using Class 4 bituminous concrete installed in 3" lifts and compacted. Prior to paving, the Contractor shall verify that the 10" processed gravel layer is present. If the processed gravel layer is missing or is less than 10" deep, the contractor shall install the processed gravel layer to Town specifications and compact the area as required. Permanent paving is to be completed prior to the end of the construction season. The Contractor shall schedule paving early enough in the autumn to avoid delays due to weather or other conditions, which could affect the outcome of the paving. All compaction and paving shall be completed in accordance with the most recent edition of the State of Connecticut Department of

Transportation, Standard Specifications for Roads, Bridges and Incidental Construction, Form 816.

Joints:

Pavement joints shall be sealed with an approved asphaltic material filling with a nozzle from the bottom up in accordance with the most recent edition of the State of Connecticut Department of Transportation, Standard Specifications for Roads, Bridges and Incidental Construction, Form 816.

Safety:

The Contractor shall be responsible to follow all applicable OSHA Regulations.

Inspections:

All road work must be inspected. Inspections must be scheduled with the Public Works Department a minimum 48 hours in advance of the start of work. Cut back limits must be painted by the Contractor and approved by the Director of Public Works prior to the Permanent Trench Repair. Non-emergency work shall not occur before 7:00am or after 3:30 PM. All disturbed areas within the Town's Right-of-Ways shall be restored to the satisfaction of the Director of Public Works. Excavations performed without a permit or that have not been inspected are subject to a requirement that test pits be performed by the Contractor in the presence of the Director of Public Works or his designee, to verify proper installation of piping, structures and trench materials.

Traffic Control:

The Contractor shall prepare and execute a Temporary Traffic Control Plan, which conforms to the latest edition of the Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD), Part 6, Temporary Traffic Control, as published by the US Department of Transportation, Federal Highway Administration. 4. All Detours shall be pre-approved by the Police Department.
5. All lanes of traffic shall be opened at the end of each work day unless pre-approved by the Police Department.
6. Traffic control devices such as sign patterns, cones, lights and barriers shall be displayed as required in the Manual on Uniform Traffic Control Devices for Streets and Highways, most current edition.

Maintenance:

The Contractor is responsible to repair and maintain work within the ROW, including curbs, trenches and sidewalks for a minimum period of three (3) years. Work shall be free

from defects including cracking, heaving and/or sinking. Contractors must perform emergency maintenance within four (4) hours and minor maintenance within 24 hours of notification by the Public Works Department. Any work not completed within the time specified or work that does not meet Town of Middlebury requirements will be repaired by the Town of Middlebury at the Contractor's expense. A minimum fee of \$500 will be charged for any required work. Cold patch, when allowed shall be Class 5A. It is the Contractor's responsibility to notify the Town's Public Works Department for an inspection 24 hours prior to completing work covered by the permit. The Contractor's limit of responsibility for work can not be determined and proper credit will not be granted until the Public Works Department has been notified in writing of the permanent repair and the work has been inspected.
